Legend & Methodology

Color coding by column

Hist. Low

- Green:** Current price is a historical new low
- Yellow:** Price matches a previous all-time low

Discount

- Red:** Poor discount: less than 60% off
- Orange:** Fair discount: 60-79% off

AI Fun

- Red:** Low fun rating: below 0.65
- Yellow:** Mid-range: 0.65 to 0.79

ProtonDB

- Red:** Below Gold: Silver, Bronze, or Borked tier

Unhighlighted cells met the default threshold (e.g., 80%+ discount, AI Fun ≥ 0.80 , Gold/Platinum).

Review rating shorthand

- +++** Overwhelmingly Positive
- ++** Very Positive
- +** Mostly Positive

AI Fun rating

0.0-1.0 score from a multi-LLM panel (see Data sources below).
Colored cells: red if < 0.65 , yellow if 0.65-0.79, no highlight if ≥ 0.80 .

Historical low labels

- NEW LOW** Current price is lower than any previously recorded price.
- MATCHES** Current price equals a previously recorded all-time low.
- NOT LOW** Current price is above the historical lowest price.

Data sources

Cart contents: Steam store, authenticated via Firefox session cookies.
Game details (name, price, discount): public Steam store API.
Linux support & reviews: public Steam reviews/store APIs.
ProtonDB compatibility tiers: ProtonDB public API (protondb.com).
Historical-low classification: parsed from a saved SteamDB wishlist page.
AI fun ratings: a parallel panel of Gemini, GLM, and Codex subagents scores each game 0-1, and the average is written to the report.
